

PH Zug

Course Overview

English Course Programme

Primary Education

for Incoming Students

Kanton Zug

Pädagogische Hochschule Zug

General Information

The courses on this list will be offered completely in English or bilingual (German/English). Bilingual modules have a certain amount of German language but most of the work will take place individually or in small groups with English as the working language. All relevant materials will be available in English. Regular students will attend these courses as well. The modules in yellow are **mandatory**. The **green** module is offered by PH Zurich.

We reserve the right to make changes.

Professional Knowledge / Professional Practice

Module Number	Module Name	ECTS
BEPX IN A 16	Teaching Practice (1/2-2 days per week)	4

Version February 2023

Professional Knowledge / Professional Practice

BEPX IN A 16: Teaching Practice

Module description

Students will spend a minimum of a half day up to 4 half days per week (10 weeks total) in a local primary or secondary school, where they will undertake the planning and teaching of a minimum of two weekly lessons, and additionally have the opportunity to observe other teachers' teaching. They will receive weekly coaching and feedback from the class teacher, and at least one observation visit from their PH Zug mentor per semester. Teaching, coaching and feedback will take place in English. Feedback and assessment will be based on previously-agreed assessment criteria.

BEMN IN A 16: Mentoring Teaching Practice

Mentor: Olivia Green, olivia.green@phzg.ch

Module description

Students will be allocated a personal PH Zug mentor, who based on individual needs, will provide support, pedagogical input and practice tasks connected to the weekly teaching practice. Students will have 15 hours of tutoring, which they are free to divide between coaching, input and practice tasks. These sessions will take place one-to-one, or in small tutor groups.

Assessment

Active preparation for, and participation during, these tutorials is required to pass this module.

BEPK IN A/B 16: Teaching Practice (2 or 4 weeks in January)

Module description

Students are able to continue their teaching practice in a 2-, or 4-week block after the end of the semester. During this block of teaching practice, students will be responsible for the preparation and teaching of the great majority of subjects/lessons for the entire 2, or 4 weeks, respectively.

Students will receive daily coaching and feedback from the class teacher, and at least one observation visit from their PH Zug mentor. Teaching, coaching and feedback will take place in English. Feedback and assessment will be based on previously-agreed assessment criteria.

Methodology

MKIU GM E 16: Teaching and Learning Music 5

Lecturer: Helen Büchler, helen.buechler@phzg.ch

Learning goals/competencies

Students are able to...

- lead and accompany a group with their instrument.
- give feedback to groups with a view to helping them develop their musical abilities.
- compose arrangements for particular levels by including the range of available instruments and body percussion effects.

Module description

By working in small groups, students will compose small arrangements and songs for particular levels with the guidance of the instructor. These will then be practiced individually within the group with the help of the students, and then performed within the seminar group.

Assessment

Presentation of the group work, whereby each student conducts and accompanies a song with his or her instrument.

Students have to bring their own instrument.

➔ *This course will only take place if chosen by at least three English speaking Incomings*

ENF1 PS A 16: English Methodology 1

Lecturer: Olivia Green, olivia.green@phzg.ch

Learning goals/competencies

Students...

- reflect on and develop an awareness of their beliefs and attitudes towards foreign language learning and teaching
- are able to analyse and understand the relevance of the theory of foreign language learning and teaching to the practice in the primary classroom
- gain an insight into the language skills and associated teaching methodologies
- gain an overview of language learning theory
- gain an overview of specific problem areas in the foreign language classroom, including heterogeneity, and the use of English as the classroom language
- understand the Central European Framework as a tool for language ability assessment
- are familiar with the key learning goals of the Kanton Zug English Curriculum and the current teaching materials (including their approach)
- have the required English language ability (minimum B2) and English classroom language to address different classroom situations when teaching English.

Module description

This module introduces the student to the concepts of foreign language learning and teaching by considering the students' own attitudes and experience, as well as the relevant theory and its application to the classroom. There is further focus on the student's individual English language ability, and practice of basic teacher classroom language.

Please buy the following book and bring to the first lesson. Bucher Balmer in Zug have organised enough stock for all students:

Carol Read (2014), 500 Activities for the Primary Classroom, Macmillan Education

ISBN 978 1 4050 9907 3

A 'Skript' will also be provided in the first lesson, for which you will be charged by the PH.

Assessment

LN 1 Logbook (written reflection)

LN 2 Oral examination on 'Classroom Language'

MKF1 PS A 16: Music Methodology 1

Lecturer: Henk Geuke, henk.geuke@phzg.ch

Learning goals/competencies

Students...

- are aware of all facets of music in the context of schools and are able to understand its effect on others.
- have made a deliberate effort to understand the importance of singing, music-making and movement as subjects.
- understand the effects of their voice and can perform the songs, rhymes and raps they selected.

Module description

In addition to exploring the role of music in school, students are encouraged to actively integrate music into their lessons. Furthermore, they are able to identify the competencies they still need to develop by the end of their studies. A strong emphasis is placed on using the voice in the classroom and on selecting songs that are appropriate for the ages from kindergarten to the end of sixth grade.

Assessment

A short video documenting an individually selected music sequence that demonstrates singing, music-making or movement. The sequence should last not more than 90 seconds and include self-reflection.

MKF1 PI A 22: Music Methodology pi 1

Lecturer: Daniel Hildebrand, daniel.hildebrand@phzg.ch

Dates: 6.9.2023 – 4.11.2023

Learning goals/competencies

Students will be able to lead short musical sequences from existing teaching materials, making references to the curriculum.

Module description

The six areas of competence of the curriculum are presented and practically tested. The students establish references to the existing teaching materials. Leading short sequences is taught and practiced. This includes song introductions, song leads, song accompaniments, rhythmic games, listening exercises, singing-in exercises, simple dances and design assignments.

Assessment

Lead a 10-minute musical sequence from a teaching resource (in partner work if possible).

MKIU IN A 16: Instrumental Instruction – Guitar or Piano

MKGS IN A 23: Voice Instruction – Singing

Lecturer: Helen Büchler, helen.buechler@phzg.ch

Learning goals/competencies

Students understand the basics of singing or song accompaniment and are able to apply them in a range of settings.

Module description

Following an individual evaluation in singing or instrumental instruction, students pursue their personal goals in this area by focusing on song accompaniment for their future field of work. Besides learning about the principles of song accompaniment, they will discover ways of developing their repertoire.

Assessment

Play and sing two prepared accompaniments (this assessment takes place during a class lesson at the end of the semester). Students whose singing abilities fail to meet the assessment criteria can still pass the module if they can demonstrate a convincing command of their instrument. The prerequisites can be adjusted individually if students have prior knowledge of a certain field.

Students have to bring their own guitar.

NGF1 PS A 16: Experiments in natural science and engineering

Lecturer: Nicole Müller, nicole.mueller@phzg.ch

Learning goals/competencies

The students can conduct a factual analysis on a technology topic from the curriculum and collect the pre-concepts from the students in an appropriate way. The students can plan/design an experiment for a lesson and embed it in a meaningful way. They can formulate learning objectives of varying complexity.

Module description

This module focuses on experimentation and hands-on learning in the field of technology.

After subject didactic input, students are given the opportunity to plan experiments on a given competence themselves or in groups with subject didactic support and to carry them out with fellow students. This serves as a planning basis for implementing a teaching unit on the topic.

Assessment

The assessment consists of a reflexion on a practical experiment that is carried out in the internship class. The reflexion summarizes the "lessons learned" based on the experiences in the class and the teaching methodology.

WLBM GM C 16: Studying abroad - stretching boundaries - teaching diversity

Lecturer: Carola Mantel, carola.mantel@phzq.ch

Learning goals/competencies

Students are able to...

- reflect on their own experience in dealing with social diversity and thus train their ability to observe themselves
- establish a link between such self-observations and the professionally relevant competences for dealing with diversity, as when working with children with a migration background
- apply these competences to case examples

Module description

A mobility stay offers strong potential for learning about social diversity in a sensitive and competent manner. Here, the ability to observe oneself and others without making snap value judgements is a key prerequisite. Not succumbing to this tendency makes it easier to avoid stereotyping and instead expand one's own horizons, perceive the world from a broader perspective, and acknowledge "otherness" without having to compromise one's "ownness."

Thus the personal experience gained during a mobility stay – be it in connection with school work or extra-curricular activities – is the starting point for developing the professional competences needed for managing social diversity. To this end, students will actively exchange ideas, do sensitisation exercises and discuss the theoretical side of their experience by linking their understanding of "otherness" with the competencies that teachers need when dealing with social diversity.

Assessment

100% attendance, completion of all assignments during the stay.

USFE GM A 16: Oral Communication in School 1

“Once upon a time...” – Storytelling in classroom

Lecturer: Judith Kreuz, judith.kreuz@phzg.ch

Learning goals/competencies

Students...

- research and understand scientific literature on the acquisition of narrative competence of children,
- develop their own exercises to promote narrative competence of pupils,
- try out these exercises in class and/or in the seminar,
- receive feedback (via video analysis) from fellow students,
- conduct and analyse two qualitative interviews each with pupils or teachers,
- write an empirical paper,
- participate in the planning of a storytelling festival in spring semester 2024.

Module description

In this research and development project, students learn about the development and promotion of narrative competence of children through theoretical and practical approaches. In addition, the students themselves try out free storytelling by means of various exercises (also in teaching practice in school) and reflect on their experiences with (video) feedback. In addition, they will gather their own empirical findings on story telling in classroom through qualitative interviews. The aim of the seminar is also to plan a storytelling festival (spring semester 24).

In addition, students are supported in training their own conversation and speaking skills so that they can professionally guide communication exercises by setting an example in class.

Assessment

100% attendance

Completion of all assignments during the stay

Active participation

A kick-off seminar will already take place in June, which the incoming students will not be able to attend. Instead, they will receive a separate preparatory task.

USFE GM A 16: Oral Communication in School 2

The App “Let’s Talk!” – Building bridges between research and school practice

Lecturer: Lee Ann Müller, lee.mueller@phzg.ch

Learning goals/competencies

Students...

- research and understand scientific literature on topics of oral communication in school (e.g., listening, multilingualism, conversational competence, drama in education, etc.),
- conduct two to three qualitative interviews with pupils or teachers,
- analyse and interpret the conducted interviews,
- develop contents for the web app “let’s talk!”: www.letstalk-now.ch,
- write an empirical paper.

Module description

This research and development project is about students being able to independently develop content for the web app “let’s talk!” and thereby connecting research and school practice. To do this, they research scientific literature on different topics of oral communication in school, generate and analyse data from practice (e.g. interviews with teachers or pupils) and develop app content based on their research findings.

The results will be uploaded on the web app and culminated in an empirical paper.

Assessment

100% attendance

Completion of all assignments such as developing content for the web app “let’s talk!”

Active participation

A kick-off seminar will already take place in June, which the incoming students will not be able to attend. Instead, they will receive a separate preparatory task.

MUA720: Switzerland – nature, culture and society (seminar and excursions, offered by PH Zurich)

The module takes place every Friday afternoon at PH Zurich. Mode: 2 hours tutorial or excursions according to the programme.

Learning goals/competencies

Acquaintance and knowledge about the host country Switzerland in different areas: Geography, History, Politics, Economy, Education, Language, Literature and Culture

Module description

This module provides an overview of Switzerland in its diversity. The students will present and discuss geographical, historical, social and cultural topics in seminars, on various excursions and on self-study basis. (Detailed course out-line will be handed out in the first session.)

Examination

- Presentation of one topic (to be chosen from the list of topics) plus handout
- Team work: Organisation of excursions
- Option: Written assignment on one topic to be handed in until the end of the semester (2 extra ECTS)

Students are expected to be present. If students wish to obtain ECTS credits they have to hand in a proof of achievement and help organising the excursions in small groups.

Contribution to the costs

A contribution to the excursions of CHF 40 (to be paid in the first session). All other costs for train rides and entrance fees will be subsidised by the PHZH International Office/PH Zug International Office. With the offered half fare card, the train ticket to Zurich and retour to Zug costs 17,40 CHF. This needs to be paid by the student.

ECTS

4 ECTS credits without written assignment.

6 ECTS including written assignment (12-15 pages)

Education and Schooling

EZPI PS A 16: Person & Interaction

Lecturer: Martina Wey, martina.vey@phzg.ch

Learning goals/competencies

Students ...

- can explain various concepts and theories of personality and social psychology and are able to critically question them.
- establish superordinate connections between different subject areas.
- can analyse contents from different theoretical perspectives.
- can highlight the significance of psychological topics being discussed for school and teaching.
- expand their competencies as a teacher.

Module description

The module provides an overview of the important topics of personality and social psychology by focusing on individuals' concept of self, self-esteem, self-efficacy and self-regulation, as well as on the underlying theories of emotions and motivation. The module places strong emphasis on how social influence, power, biases, and various communication models can shape the processes of social interaction. These topics are discussed with regard to their significance for the school and teaching, and are developed further in various ways during a seminar.

EZHP GM A 16: Special Needs Education

Lecturer: Rico Pfaffhauser, rico.pfaffhauser@phzg.ch

Module description

The seminar gives an overview of different topics that are relevant for the integration of children with special needs in elementary school and focuses on the collaboration of the class teacher with the special education teacher, other school personal and parents. Furthermore, an overview about the historical development of special education in Switzerland will be given and discussions about the challenges of a successful integration of children with special needs will be held.

Students will work in groups and will gain knowledge in various aspects of special needs. Incoming students will have the opportunity to choose individual topics according to their needs.

Assessment

Students will work in groups to prepare a roleplay of an assessment of a child with special needs. Incoming students can do the same or agree with the lecturer on a different task that fits their needs.

NGBN IN A 22: Nature and Science / Education for sustainable development

Lecturer: Simone Michel Hamdeen, simone.michel@phzg.ch

Module description

PH Zug will be able to offer a tailor-made module for incoming students that will integrate the individual needs and interests of our incoming students.

Science:

- research-distinguishing didactic situations (Haus der kleinen Forscher)
- introduction in didactic material of the learning book NaTech (especially useful for Italian or French or German speaking persons)
- inquiry-cycle-based learning
- didactic task for an extracurricular venue

Education for sustainable development (ESD):

- Getting to know the national competence center for education for sustainable development.
- Methods and examples of ESD-lessons for primary school; discussion about suitable topics for ESD-based lessons.
- Connection to other topics like energy on Primary level.

Focus Week October (9.10.-13.10.23)

WLSO GM A 16: Study trip to Orléans/Tours (France) – Education, culture, language as an immersive experience

Lecturer: Emmanuelle Olivier, emmanuelle.olivier@phzg.ch

Learning goals/competencies

Students will...

- experience different teaching styles which they will analyse according to the specific pedagogical or cultural context. They will prepare a lesson in the host country
- choose an educational topic in which they will research and meet experts in their working field. They will deepen their knowledge and exchange their experiences within the group and describe these experiences in their final report.
- take part in a didactical course at the host institution and will compare the principles with their own background
- experience useful didactical resources
- experience a different school system and will analyse these differences
- get in an exchange with teachers of the host country and will increase the development of intercultural competencies
- experience the region of Orléans with its history and geography (Jeanne d'Arc, castle visit, life in the middle ages)
- develop their communication skills in French in general and as a teaching language

Module description

In partnership with the University of Orléans/Tours, students will experience one week of intercultural, pedagogical and language exchange in Orléans, France. They will experience a different school system and will observe different teaching methods. Students will get a broader view about French language and culture which will improve their own teaching in the future. The visit is structured in three blocks: Block A: Visit of a didactical course. Block B: Deepening the knowledge about a specific topic and meeting experts in the field (e.g. handicap at school, autism etc.). Block C: Giving a lesson in a primary school (language lesson in English or German, presenting Switzerland or the home country in French)

Requirements

Students must have a B2 level in French and teach French in their home country.

Assessment

Presentation of the intercultural experience and the research after the study trip

PZG.WLKO GM A 22: Study trip to Kosova

Lecturer: Dr. Shpresa Jashari, shpresa.jashari@phzg.ch

Learning goals/competencies

Students will:

- work on a pedagogical topic together with their Kosovar fellow students and reflect on their findings with regard to their future professional profession as teachers.
- get to know another social and pedagogical context and consider the differing (and similar) conditions of learning and teaching they have encountered. practice a nuanced approach to socially prevalent notions of normality and difference and link these reflections to their future professional practice. gain insight into transnational life-worlds and thus strengthen their competencies in understanding and dealing with migration-related diversity in school.

Module description

The study week takes place in Kosova and is implemented in cooperation with the partner University Kadri Zeka in Gjilan. The focus of the week is the work on pedagogical research questions that will be developed jointly in preparation of the study week by the students from both universities. In Gjilan the students have the opportunity to visit educational institutions and do research on site. In the follow-up phase, the week is processed with regard to students' learnings and experiences. The students will discuss what they can take away from the joint work and the study week to benefit their professional practice as future teachers. Furthermore, they will reflect on whether and how the insight into the Kosovar context offers them a better understanding of their own positionalities, lifeworlds and national contexts. Considering the transnational ties of the Kosovar diaspora in Switzerland to Kosova, the study week can provide a long term benefit for students by fostering a deeper insight into transnational life-worlds and thus strengthening their competencies in understanding and dealing with migration-related diversity in school.. The results of the joint work and reflections of students experience are presented and discussed in Zug after the study week. During the visit in Gjilan, the Kosovar students host the students from Zug in their homes, which enables an intensive personal exchange and an insight into the everyday life of the Kosovar colleagues.

There are additional meetings before and after the study trip:

- First preparation meeting: June 27, 2023, 8.20 am – 11.40 am
- Follow-up meeting: October 24, 2023, 5 pm - 7 pm

Assessment

Presentation of research results and reflections of experiences in the follow-up meeting.

WLIP GM A 16: Intercultural Pedagogy 1 – Perspectives on school and belonging in post-/migration societies

Lecturer: Dr. Shpresa Jashari, shpresa.jashari@phzg.ch

Learning goals/competencies

Students will...

- approach school and teaching in interrelation with questions and challenges related to migration, diversity and inclusion.
- get an insight into Swiss migration history.
- get to know different perspectives (from the field of arts, pedagogical practice and others) on the ways in which (ascriptions of) belonging can relate to the distribution of educational opportunities.
- reflect on (sometimes stereotyping) notions of normality and difference, which can occur in the classroom and in society writ large, and explore ways of dealing with them in pedagogical practice.
- learn about creative methods to produce, present and transfer knowledge.
- work on developing their own vision of an inclusive classroom.

Module description

Migration and transnational interrelations shape Swiss society in all of its contexts: economy, ecology, media, family – and education. Today's classrooms reflect students' life-worlds that reach beyond national borders and are marked by diversity.

But however common transnationality, diversity, multilingualism etc. have become among the population, they still serve as topics of (education) political debate. For certainties and established collective self-imaginaries are put in question and negotiated. Thus, on the one hand voices demanding socio-political inclusion and freedom from discrimination are growingly heard in public debates (at the latest since the Black Lives Matter protests in 2020); while on the other hand respective political and everyday negotiation processes often continue to rely on originary and racializing notions of belonging: Who is "Swiss"? Who is seen as "foreigner" – and for how long? And what in a person makes us wonder, where they are "actually" from?

These realities and discourses do not leave students and teachers untouched. They enter the classrooms and can be challenging for teachers – and they can mark students' educational pathways, for instance through a provably unequal distribution of educational opportunities.

In the study week we will explore the following key questions: What is necessary for all children to feel being part of the classroom-"we"? And how can we shift the focus from students' origin to their ideas and wishes for the future? We will tackle these questions by hearing from and discussing with experts from different fields (such as pedagogy, arts and research). Furthermore, the module will give students the opportunity to (a.o. creatively) develop their own perspective on what an inclusive, non-discriminatory "classroom of the future" could look like.

Meetings with experts may be in German but translation will be provided as encompassing as possible.

Focus Week December (18.12.-22.12.23)

WLKO GM B 22: Visit from Kosova – Study week in Zug

Lecturer: Dr. Shpresa Jashari, shpresa.jashari@phzg.ch

Learning goals/competencies

Students from Kosovo and Switzerland will...

- choose and work on pedagogical topics together with relations to both contexts (Kosova and Switzerland) and reflect on their findings with regard to their future profession as teachers.
- experience and reflect on differing (and similar) conditions, possibilities and ideas about learning and teaching in both contexts and gain a new/clearer insight into their own respective positionalities, life-worlds and professional practices.
- practice communication and teamwork across possible linguistic hurdles and habitual differences (in work style etc.)

Module description

Students of the PH Zug receive Kosovar students of the partner university Kadri Zeka for a study week in Switzerland. The focus of the study week is on working together on pedagogical issues, which are jointly developed by students from the two universities. In the initial phase, cooperation will take place online. During the study week in Switzerland, the cooperation becomes concrete. Students are given the opportunity to visit educational institutions and conduct research on site. The results of the joint work will be presented at the end of the study week. The roles for the study week are defined as follows: PH Zug students organize school visits and other relevant visits and contacts that are necessary to deal with the questions they have chosen. They are supported by the responsible lecturer of the PH Zug. PH Zug students also enable students to enjoy home stays. The responsible lecturer of the PH Zug supports the students from PH Zug (in a preparatory meeting) before and also during the study week and leads an evaluation sequence with all students at the end of the study week. The responsible lecturers at Kadri Zeka University organize preparatory and follow-up meetings with their students according to their needs.

Preparation meeting: November 7, 2023, 12:00-13:30.

This module is limited to 15 students from PH Zug and 15 students from University Kadri Zeka in Gjilan, Kosova.

Additional Offers

DESP IN A 22: Speech and Voice Training

Lecturer: Judith Kreuz, judith.kreuz@phzg.ch

Learning goals/competencies

Students...

- learn to use their voice in a healthy and appropriate way,
- use their voice in such a way that they achieve their speaking goals in various school communication situations and do not tire their voice,
- learn to perform competently and train their body, voice and articulation for successful classroom management,
- acquire rhetorical skills and practice explaining, arguing and leading conversations,
- acquire elocution skills and practice telling stories, reading aloud and acting.

Module description

Teachers are professional speakers. Therefore, it is a training goal to develop a healthy and strong voice as well as to appear competent through rhetorical skills.

In an individual training, the personal goal of the training is first clarified. Subsequently, the already existing vocal and speaking skills are checked. Accordingly, an individual exercise programme is put together. The exercises deal with posture and body tension, healthy breathing, a resonant and healthy voice, and precise articulation. In addition, rhetorical skills are taught through various exercises, for example explaining in class or conducting conversations. If you are interested, exercises for reading a text aloud or telling a story/narrative are offered as well as basics of acting.

The module offers exercises that promote the students' own communication skills but can also be applied in lessons with the pupils. Students are supported in training their own conversation and speaking skills so that they can professionally guide communication exercises by setting an example in class.

Assessment

100% attendance

Completion of all assignments during the stay

Active participation

Remarks

The training takes place individually (1:1).

The dates are agreed individually with the lecturer.

WLCH GM A 16: Choir

Conductor: Eva Widmer, eva.widmer@phzg.ch

Module description

Participation in the choir of PH Zug. The choir performs at special events every semester and is open to all students and staff.

DESK IN A 16: German Language Course

Module description

This German language course is offered specifically for incoming students. It is offered by a student of the PH Zug who is specialized in German as a foreign language. Times are flexible in the schedule but will sum up to 90 minutes per week.

WLCS GM A 16: Campus sport activities

Module description

It is possible to take part in the on-campus sport activities. Most of the offers are free of charge and usually take place during the lunch break. You can choose from Pilates, Football, Hockey, Hip Hop/Street Dance, Volleyball, Yoga, Fitness in our gym and off-campus sport activities like Bouldering, Trampoline, Sailing or Paragliding.

You can choose **one** of the options for each week. There are no other regular courses during these weeks.

Focus week 9.10.-13.10.23:

- Study trip to Orléans
- Study trip to Kosova
- Intercultural Pedagogy 1

Focus week 18.12.-22.12.23:

- Visit from Kosova – Study week in Zug

Individual lectures for Incomings and additional offers

These offers take place at individual times that you agree on with the lecturers.

- NGBN IN A 22: Nature and Science / Education for sustainable development (2 CP)
- MKIU IN A 16: Instrumental Instruction – Guitar or Piano (1 CP)
- MKGS IN A 23: Voice Instruction – Singing (1 CP)
- DESP IN A 22: Speech and Voice Training (1 CP)
- DESK IN A 16: German Language Course (2 CP)

On-campus Sport activities

The on-campus sport activities usually take place during the lunch break. We will provide a detailed programme for these activities.

Please note :

- On Friday afternoon, the module «Switzerland – Nature, Culture and Society» (seminar and excursions, offered by PH Zurich) collides with the module «English Methodology 1» (half of the semester). Please decide which you want to attend.
- Bilingual modules have a certain amount of German language but most of the work will take place individually or in small groups with English as the working language. All relevant materials will be available in English.

*possibly an additional Teaching Practice will take place on Monday or Wednesday or Thursday
